IDENTIFIERS	*Illinois

ABSTRACT

This document presents tables and figures relating to all aspects of the community college program on all 46 campuses in Illinois as of fall 1970. Officers and members of all local boards of trustees are listed. Enrollments are broken down into full-time and part-time; day and evening; freshman, sophomore, and unclassified; credit, credit equivalency, and nonapportionment; and "in-district" and "out-of-district" students. Rank in high school graduating class of entering freshmen and academic standing of transfer students are tabulated. Faculty are described in terms of full-time or part-time, classification, academic preparation, previous experience, and teaching load. Educational programs are characterized by the number of approved programs, headcounts, and credit hours taught in each of five broad program categories. Library resources are described by the number of volumes held, the percentage of holdings in each subject area, and the availability of library and other learning resources. Financial resources and expenditures are detailed, and site and facilities characteristics and utilizations are presented. Academic calendars for all campuses are summarized. (DC)

FOREWORD

Each year since passage of the Illinois Public Junior College Act of 1965, the Illinois Junior College Board has conducted a survey of institutions in the state system in order to monitor their development. Data for this survey is submitted to the Illinois Junior College Board by each district for each campus in a document called the Annual Application for State Recognition. The following study is based on data in the recognition applications submitted by all public junior colleges in Illinois during the Fall term, 1970.

Preparation of the Report of Selected Data and Characteristics of Illinois Public Junior Colleges is a team effort. The institutions contribute basic data and edit these data. Data processing services of the State of Illinois, Department of Finance, Management Information Division, produce the data tables. Data processing is furnished by the State of Illinois, Bureau of the Budget. Financial cost data in Table 57 for the public junior colleges for 1969-70 is obtained from the Unit Cost Study of the Illinois Board of Higher Education. The Illinois Junior College Board staff analyzes the data and prepares the report.

The following annual report is the fifth one to be published by the Illinois Junior College Board. It seems timely, therefore, to review trends that are emerging in the development of the junior college system. Accordingly, the first part of this report, analyzing the data, focuses upon emerging trends.

PART I

TRENDS IN THE DEVELOPMENT OF ILLINOIS PUBLIC JUNIOR COLLEGES

INTRODUCTION

This report is the fifth in a series of annual statistical studies which aim to describe the development of the Illinois public junior college system as implementation of the Illinois Public Junior College Act progresses. With a half decade of history for the junior college system now behind us, it is possible to discern some rather amazing growth trends as a result of the "junior college movement" in Illinois.

For example, just five years since the passage of enabling legislation, the system has grown from 16 junior college districts and 23 campuses attached to local public schools into an institutional network of 37 districts and 46 campuses serving 89 percent of the people in Illinois and covering 75 percent of its geographic area. Thirty-six of these districts are now governed by local boards of control. One district, currently controlled by the State Board, operates an experimental college which is seeking to develop new and more effective ways to overcome social and economic disadvantages for people from minority groups. Today, over one-third of all college students in Illinois at both public and private institutions of higher education, studying at the freshman level through the doctoral level, are enrolled in Illinois public junior colleges. Over 50 percent of the new entering freshmen in the public and private colleges of Illinois are enrolled in the public junior colleges.

Many observers attribute the phenomenal growth of the junior college system in Illinois to the fact that college districts are locally controlled, state coordinated, and jointly financed. In the state-local district partnership, the state bears approximately 35 percent of the cost of junior college operations and up to three-fourths of the construction cost of facilities. Local taxes, student tuition, and other funds mustered by the districts to provide for the cost of education are mute testimony to the popularity of open-door community colleges among the citizens of Illinois.

As one reads through the pages of this report and digests the facts of what has really happened during the "junior college movement" in the state, he suddenly realizes that in the short span of a half decade almost all the people in Illinois have secured college education opportunities for themselves within easy commuting distance of their homes and many are taking advantage of these opportunities. In this venture, the people have been "captains of their fate" through the principle of local junior college establishment and control. To thousands of citizens and to countless tens of thousands of future citizens the pioneers of the junior college system have left this legacy:

1. An abundance of educational opportunity beyond high school for continuous learning throughout life.

2. Comprehensive curricula leading to additional higher education at senior colleges and universities, increased employability through career programs, and personal and social development through continuing education.

3. A wide range of services which are designed to improve the quality of life and the economic status of communities across the state.

4. An open-door admissions policy, making college education available to all people who can profit from it regardless of race, color, religious creed, national origin, socio-economic status, or academic ability level.

5. And all of this is at a price that almost anyone can afford.

For the people, then, the junior college system in Illinois is a precious tool for perpetually developing more effective citizenship and leadership for our free society. The efficacy of the local district-state partnership with local control and state coordination should be abundantly clear to all now.

DIRECTORY--Tables 1 through 2B

Figure 1 shows the district organization of Illinois public junior colleges and their location in the state at the opening of school in the fall of 1970. Tables 1, 2A, and 2B in Part II of this report also show the current address and telephone number of each campus, the chief administrative officer of each campus and district, as well as the officers and members of each local district board of control.

Three newly established junior colleges are operating for the first time this year as a part of the Illinois public junior college system--Oakton Community College (formerly Niles-Maine), Lewis and Clark Community College (Monticello College), and Lincoln Trail College (the third campus in the Illinois Eastern Junior Colleges District). Campuses were also reorganized and renamed in the Chicago City Colleges District prior to the opening of school in the fall of 1970. The Chicago City campuses are Amundsen-Mayfair, Kennedy-King, Loop, Malcolm X, Olive-Harvey (formerly Fenger and Southeast), Southwest (formerly Bogan), and Wilbur Wright.

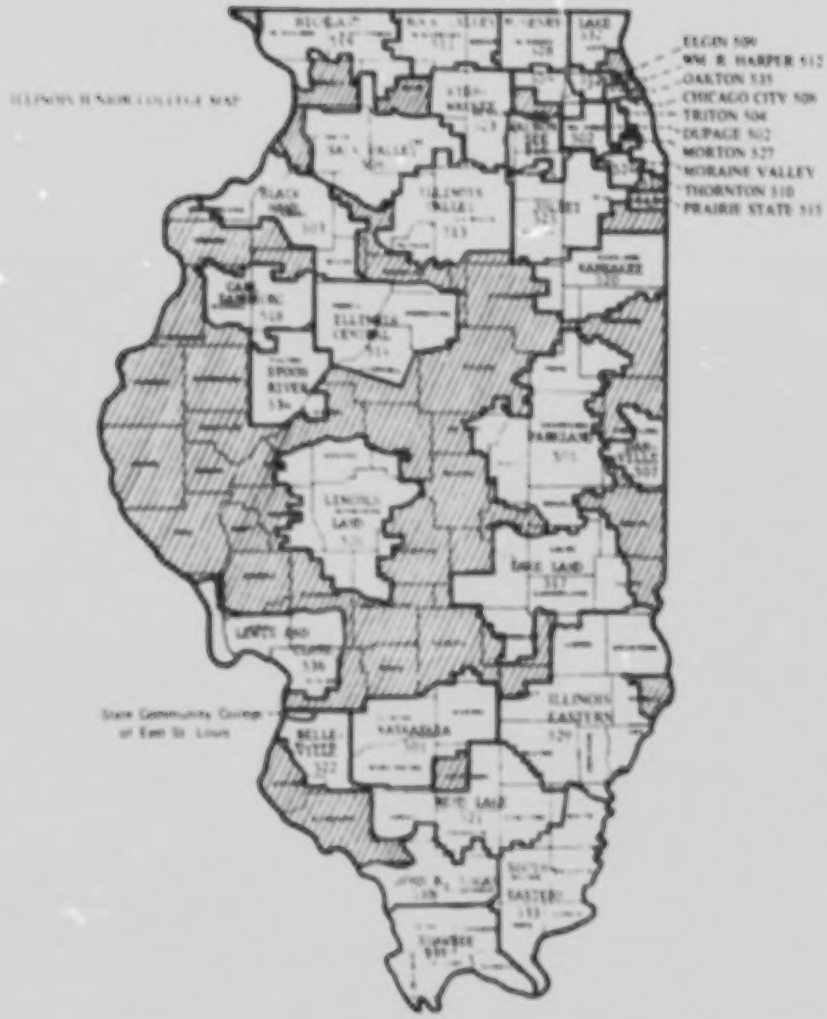
FALL, 1970



STUDENT CHARACTERISTICS--Table 3 through 15

The total number of students (headcount of full-time and part-time students) enrolled in Illinois public junior colleges was 169,961 for the fall of 1970. This number represents an increase over the previous fall enrollment of 14.8 percent. Headcount enrollment trends since 1965 are shown in Figure 2. The full-time equivalent enrollment (FTE) on the 46 campuses totaled 94,617 students. This represents an increase of 17.8 percent over the previous year. The full-time equivalent (FTE) student is a theoretical statistic used to equate the size of student enrollments in courses. To obtain the FTE, Illinois junior colleges divide the number of credit hours for which all students are registered by 15--the figure 15 being the average full load for one student during a regular term. Credit hours generated by all courses on all campuses totaled 1,419,277 for the fall term, 1970, an increase of 17.9 percent over the previous year. This figure includes both quarter hour credits and semester hour credits.

Detailed Analysis of Enrollments

Credit programs in the public junior colleges include all courses for which college credit is granted. In the fall of 1970, 80.6 percent of all headcount students were enrolled in credit courses. Credit equivalency is granted in non-credit courses which qualify for state financial support. In fall, 1970, 15 percent of all headcount students were enrolled in credit equivalency courses. Non-apportionment programs are composed of credit and non-credit courses which do not qualify for state financial support. In fall, 1970, 4.4 percent of all headcount students enrolled in courses of this kind.

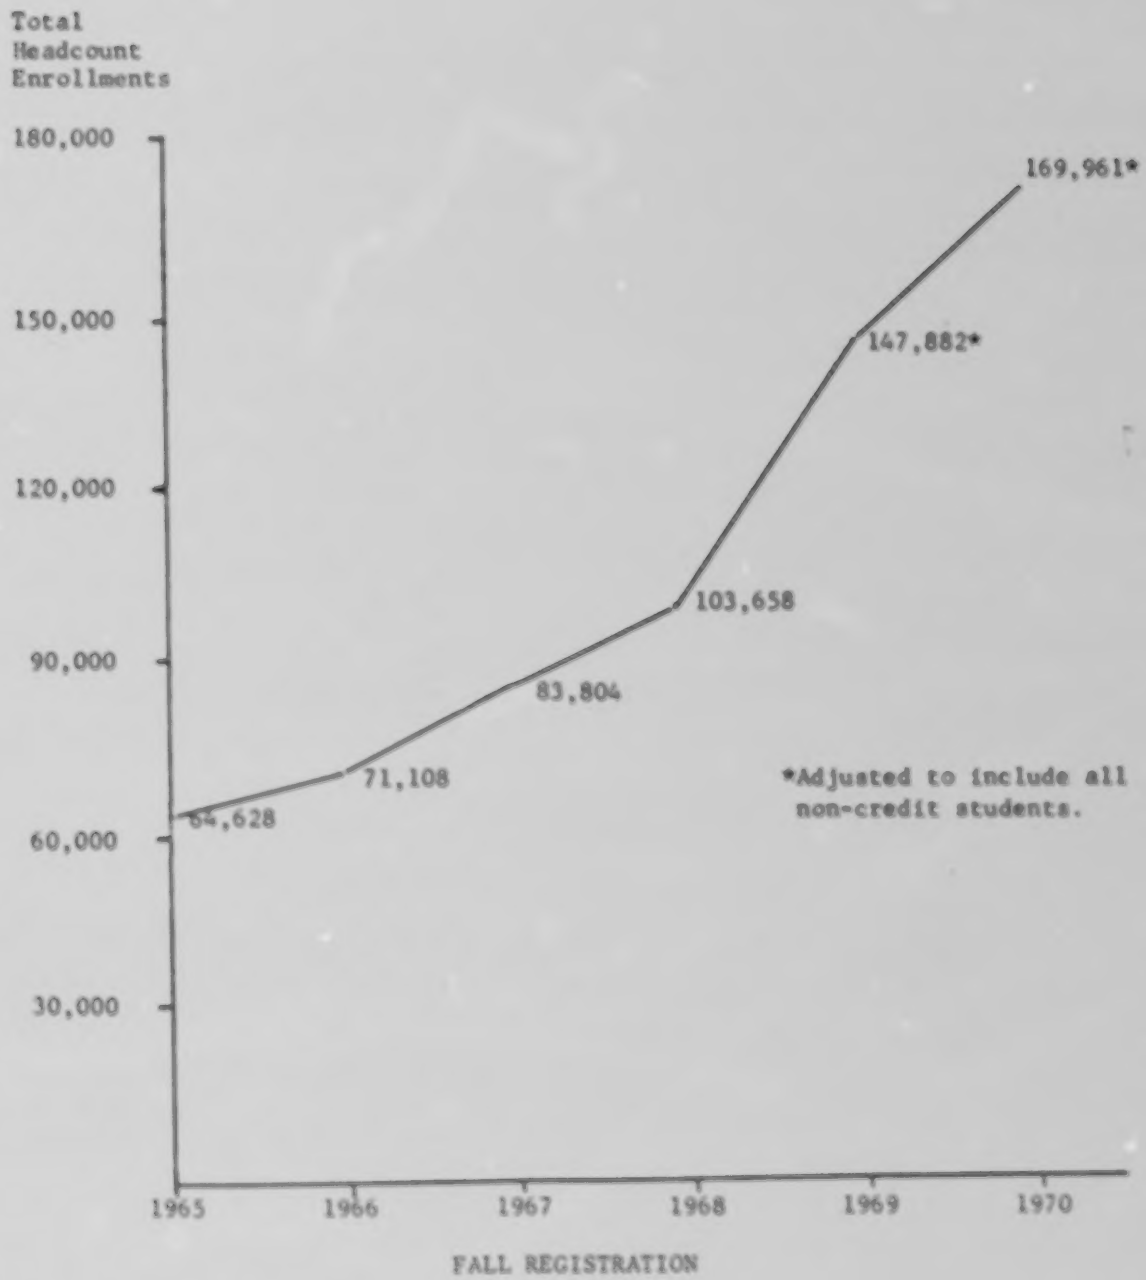
The typical public junior college caters not only to full-time students but to part-time students in large numbers since many of those in attendance are working to pay for their college education. Illinois public junior colleges appear to be functioning well for part-time students. In fall, 1970, 62 percent (105,211 students) of all headcount students were enrolled on a part-time basis, while 38 percent (64,750 students) were enrolled full-time.

Public junior colleges also operate extensive evening programs. Evening courses are offered in large numbers to part-time students who work during the day. Evening courses are also necessitated by physical facilities which are cramped for adequate space. Evening enrollments (courses offered after 5 p.m.) accounted for 28 percent of all credit, credit equivalency and non-apportionment hours granted during fall, 1970. The number of evening FTE students was 26,625 while 67,992 were day FTE students.

Also typical of the public junior college is the fact that many students do not follow the usual freshman and sophomore class definitions commonly associated with residential colleges and universities. Commuter students of all ages and from all walks of life tend to enter and leave the enrollment ranks in a continuous flow. Hence, junior colleges accumulate large numbers

FIGURE 2

TOTAL STUDENT HEADCOUNT ENROLLMENTS
ILLINOIS PUBLIC JUNIOR COLLEGES
1965-1970



of unclassified students who seek to complete a course or two for myriads of different personal reasons. In fall, 1970, 31 percent (53,026) of all headcount students were enrolled on an unclassified basis, 52 percent (88,392) were listed as freshmen and 17 percent (28,543) were listed as sophomores. The number of students by curriculum area is found later in this report in the section on Educational Program Characteristics.

Public junior colleges are primarily local institutions. Therefore, most students reside in the districts where they are attending college. In a state coordinated system of junior colleges, however, some programs--particularly those of high cost--are located on a few campuses and are made available to students throughout the state. Also, in Illinois at the present time, students living in non-junior college territory may attend a public junior college and have a part of the cost paid by the local taxpayers in the non-junior college territory. Thus, a number of students attending public junior colleges in Illinois reside out of the junior college district where they are enrolled. With a junior college system as large and well-known as the one in Illinois, some students will also come from out-of-state to attend classes even though they pay a premium in extra tuition. In fall, 1970, 91 percent (154,718) of all headcount students enrolled at public junior colleges were "in-district" residents, 8.6 percent (14,535) were "out-of-district" residents, and .4 percent (708) were "out-of-state" residents.

FACULTY CHARACTERISTICS--Tables 16 through 27

Professional staff in Illinois public junior colleges serve in different capacities which were organized into eight classifications for this report. The classifications and percentage of total staff assigned to each are as follows:

1.	Instruction	86.3%
2.	Learning Resource Services	2.1%
3.	Student Services and Aids	4.5%
4.	Public Service	2.1%
5.	Data Processing Services	.6%
6.	General Administration	3.7%
7.	Auxiliary Services	.6%
8.	Organized Research	.1%

Some individuals are employed on a full-time basis to serve in one capacity only. Other full-time staff have split assignments and serve part-time in two or more capacities. Part-time staff are also employed by the colleges to serve in one or more capacities. Last fall 4,844 staff members were employed on a full-time basis and 3,527 were employed on a part-time basis for a total of 8,371 professional staff.

Academic Preparation

Academic preparation of the total professional staff is an important trend to follow during the formative years of a burgeoning system of new public junior colleges. Interestingly enough, in Illinois the academic qualifications of the total professional staff have not suffered during the last five years as a result of phenomenal growth caused by establishment of the new system. As Figure 3 shows, professional staff holding earned Doctor's degree have increased about elevenfold. Professional staff who have completed thirty hours of graduate work beyond the Master's degree have decreased only slightly. Professional staff holding the Master's degree have decreased ten percentage points, while those holding a Bachelor's degree or less have increased sharply. These phenomena are due in large measure to dramatic expansion of occupational and adult-continuing education offerings in the public junior colleges during the past five years. Often job experience is a more effective means of preparation for the teacher of many vocational courses than is advanced academic preparation. The same may be said for courses in the adult-continuing educational curriculum since many of these courses are designed to enhance the job skills of students. During this period the education profession generally also has begun to emphasize the use of more para-professionals to assist in instruction and instructional support operations. Most para-professional positions require only two years of college preparation.

Previous Experience of New Professional Staff

Professional staff newly employed by public junior colleges during the current academic year come from a diversity of jobs both within and outside the educational profession. As Figure 4 shows, over 53 percent of those employed were previously employed in education. Over 36 percent were previously employed in business, industry, or other non-educational occupations such as self-employment in farming. Over 10 percent had no previous full-time employment. This diversity of employment backgrounds of new professional staff augurs well for the development of open-door colleges which cater to a wide diversity of people and educational needs. The large number of new professional staff from business and industry and other fields is due to greatly expanded offerings in vocational training and new adult-continuing education offerings aimed at upgrading the employability of Illinois citizens.

EDUCATIONAL PROGRAM CHARACTERISTICS--Tables 28 through 54

An analysis of educational programs during the Fall semester, 1970 shows the following distribution of programs with their student headcount enrollments and credit hours of instruction produced:

FIGURE 3

ACADEMIC PREPARATION OF THE TOTAL PROFESSIONAL STAFF
ILLINOIS PUBLIC JUNIOR COLLEGES
FALL, 1966 AND FALL, 1970

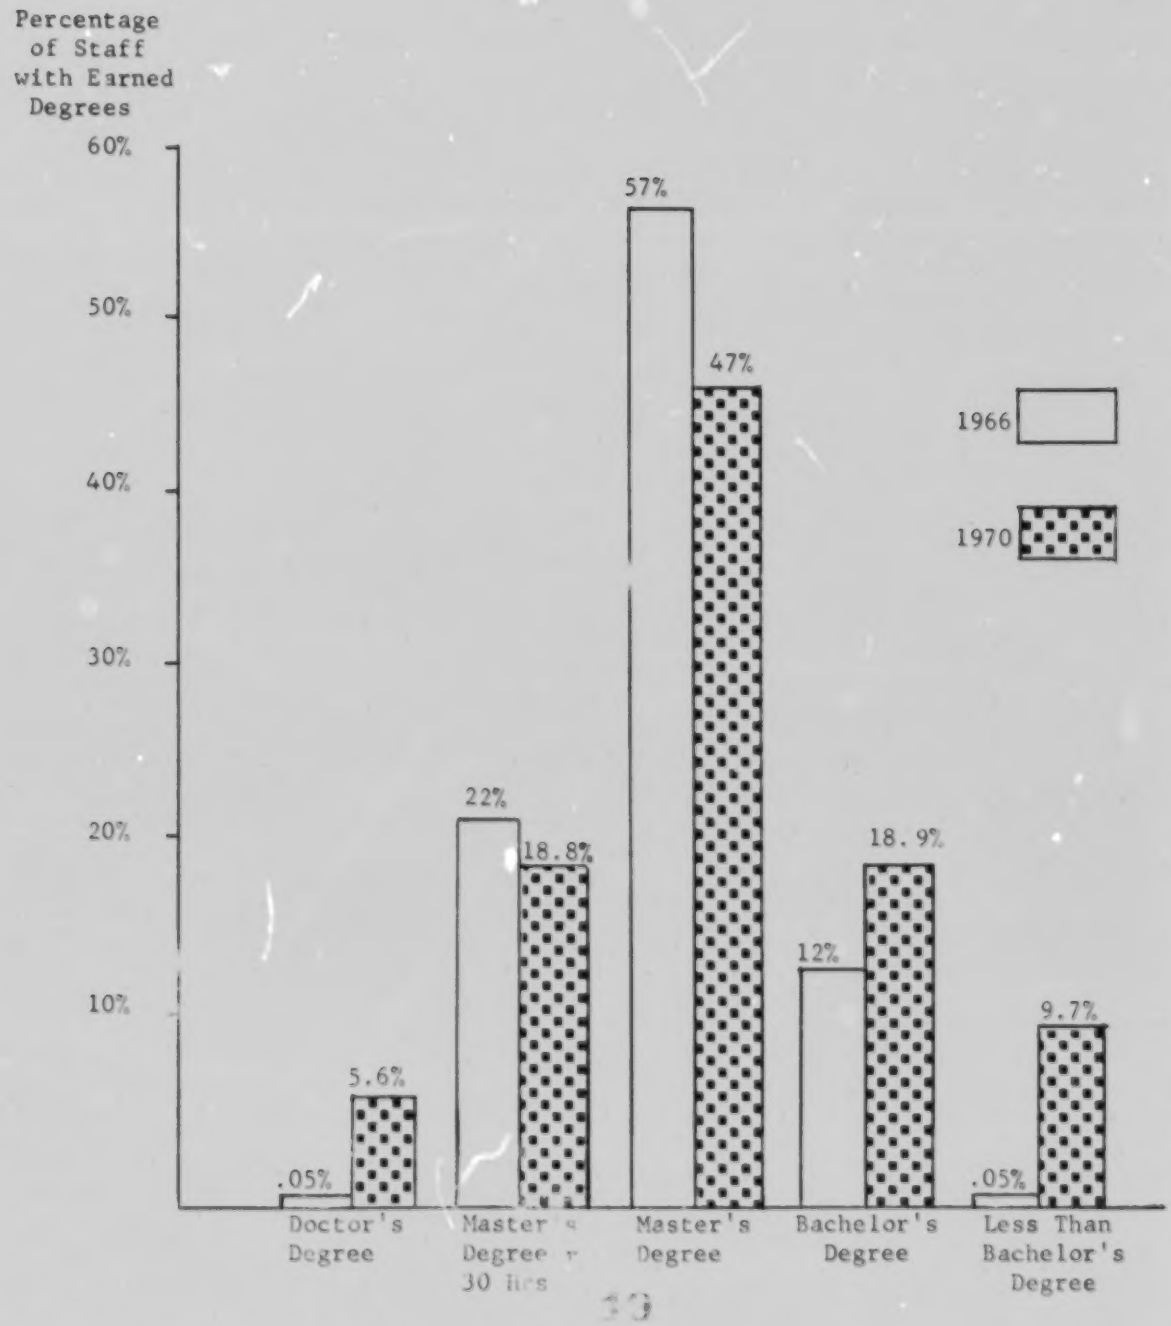

FIGURE 4

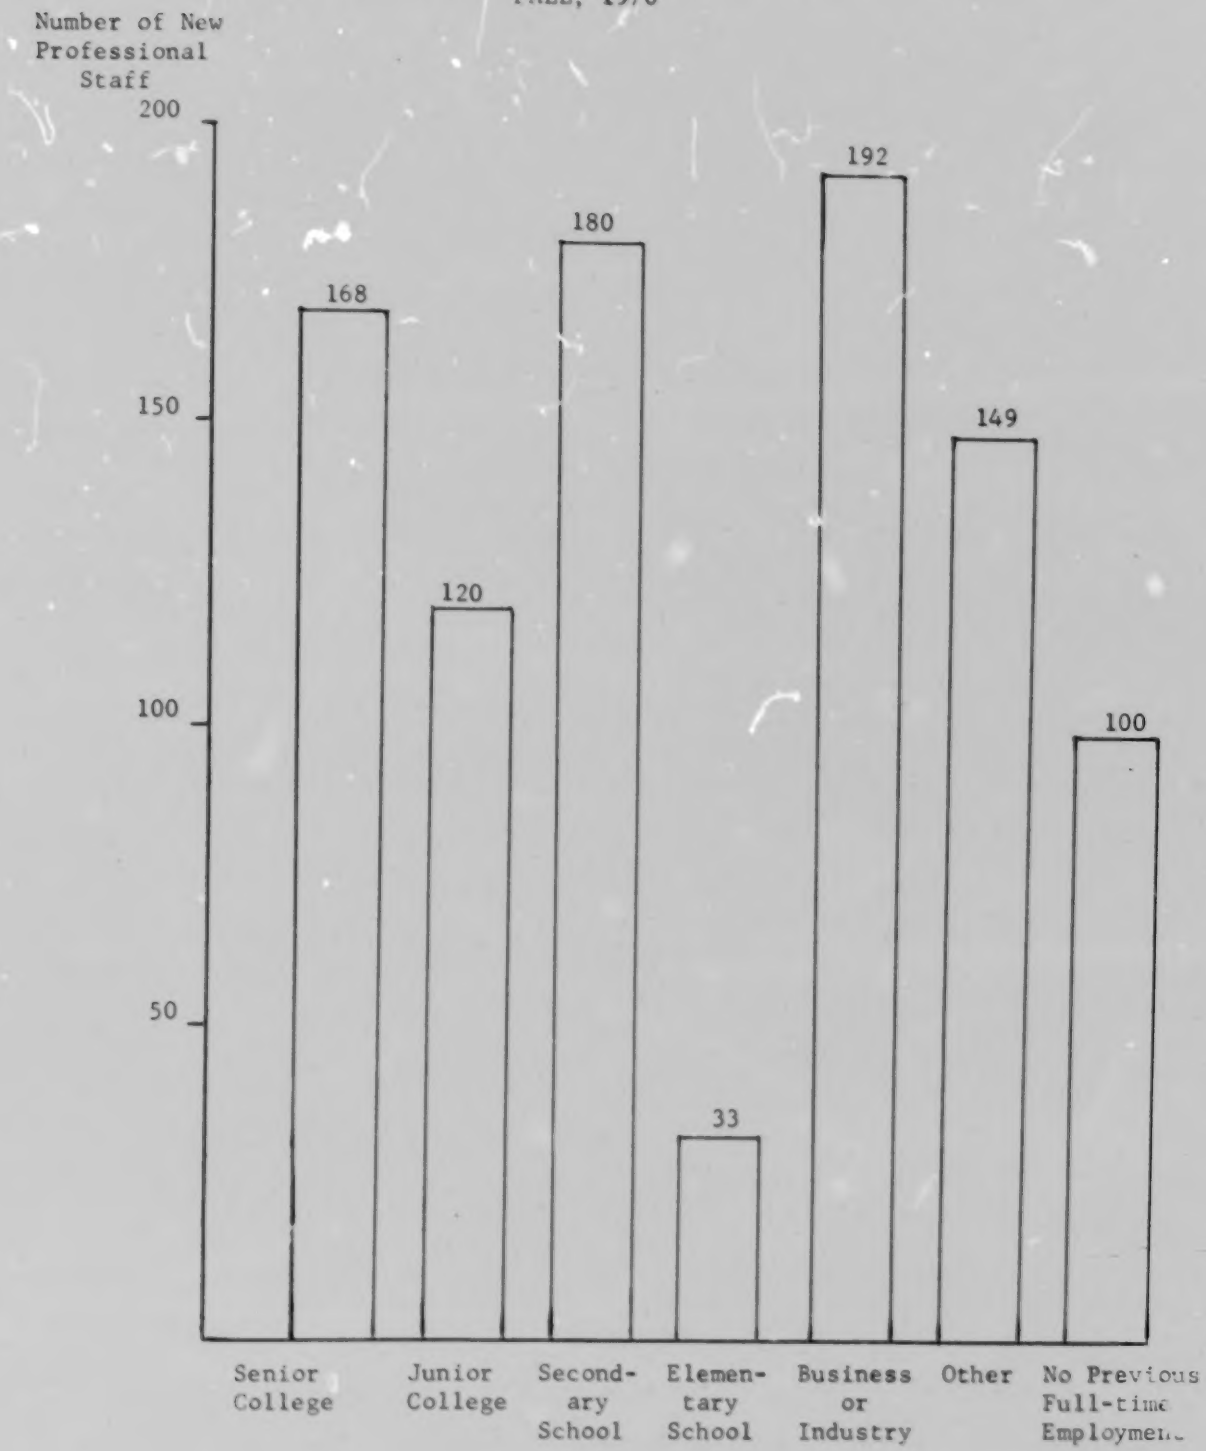
PREVIOUS EMPLOYMENT OF NEW PROFESSIONAL PERSONNEL
ILLINOIS PUBLIC JUNIOR COLLEGES
FALL, 1970



BEST COPY AVAILABLE

Type of Program	Number of Approved Programs	Headcount	Credit Hours
Baccalaureate Oriented	619	69,751	864,118
Occupationally Oriented	927	42,703	322,587
General Studies	51	7,234	54,086
Adult and Continuing Education	214	12,777	47,667
Unclassified	0	37,496	120,819
Totals	1,811	169,961	1,419,277

Figure 5 shows the growth of courses in the four basic compartments of the public junior college curriculum during the last three years. It is interesting to note that the rate of increase of baccalaureate courses now tends to decline, whereas, with occupationally oriented courses the rate of increase is accelerating. Adult-continuing education courses are growing at a steady rate. When we consider that well over half of the adult-continuing education courses offered in junior colleges are designed to upgrade the job skills and employability of people, we begin to realize the tremendous growth in Illinois public junior college curriculums since 1968 in ways that train people for the world of work rather than for transfer to senior colleges and universities. This trend promises to continue. Also of interest is the steady increase in general studies or developmental courses. Figure 6 shows enrollment percentage distributions by program orientation.

It is obvious from Figure 7 that large group lecture sessions of over 100 students commonly found in public junior colleges across the country are not being scheduled very much in Illinois. This is in large measure due to the fact that most of the junior colleges in Illinois are presently housed in temporary facilities and are not able to accommodate groups of such size. When permanent facilities become available with teaching auditoriums for large groups, many efficiencies of operation in instruction will accrue to the taxpayers of the state through the scheduling of large group lecture sessions. The vast majority of classes range in size from 11-50 students during the fall of 1970.

Library Resources

Tables 47, 48, and 49 in Part II of this report provide information about libraries and learning resources at each public junior college campus. Good growth in libraries and learning resources has occurred throughout the system during the past year as the following facts indicate:

1. Total volumes held	1969	774,054
	1970	949,407
2. Average volumes per campus	1969	18,430
	1970	22,079

FIGURE 5

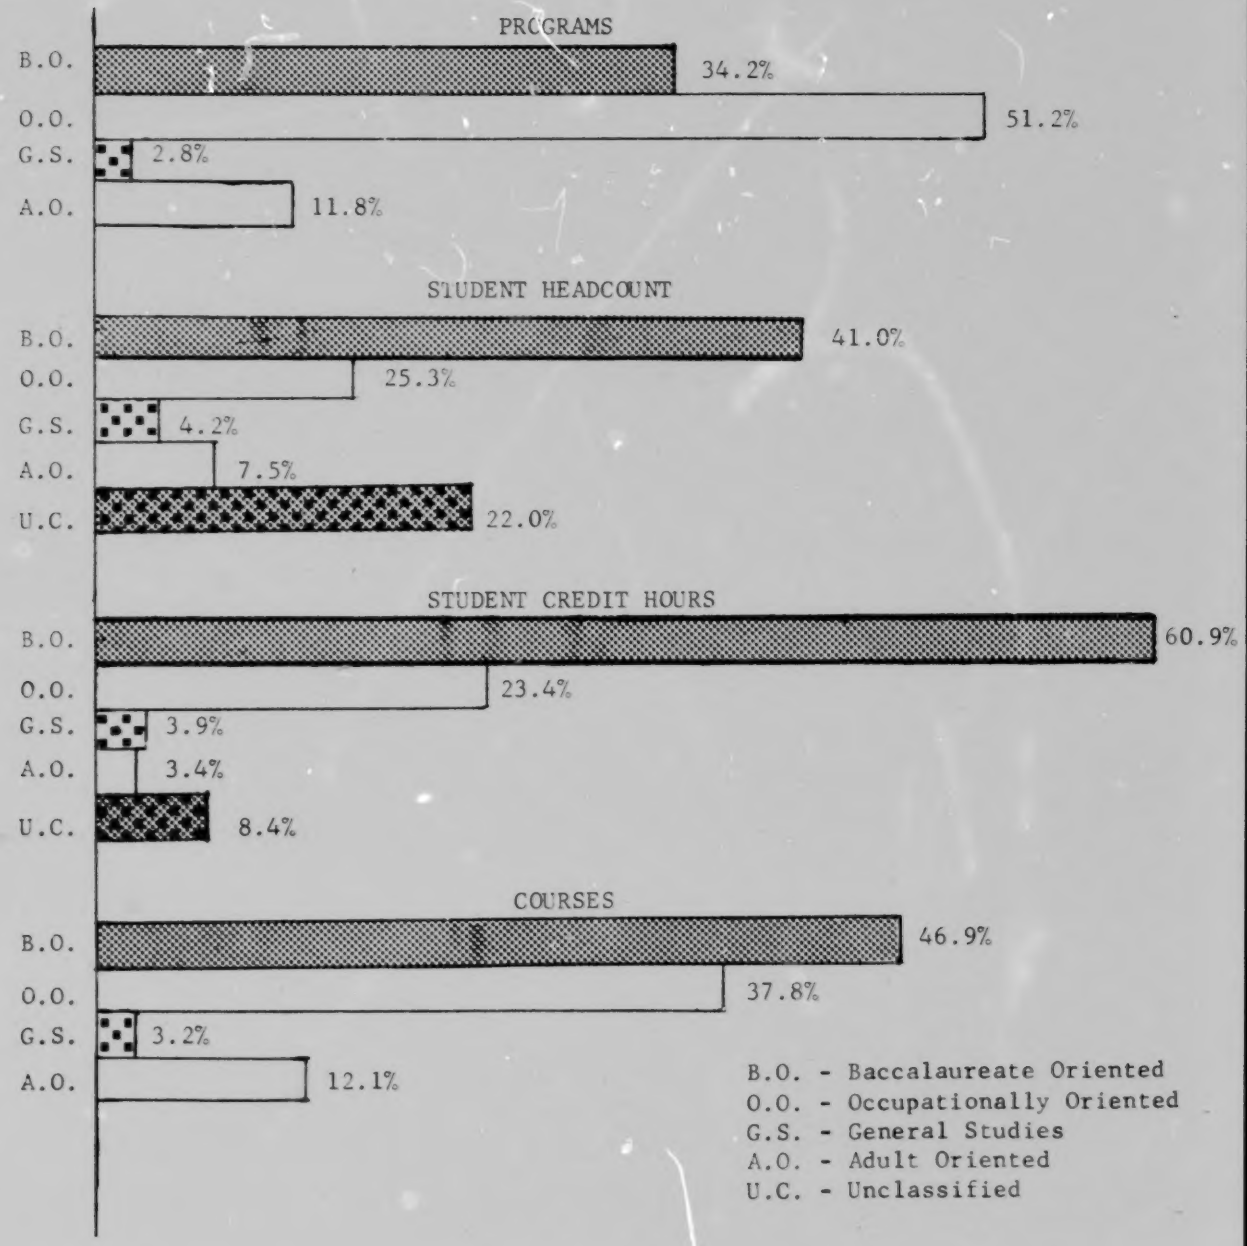

FIGURE 7

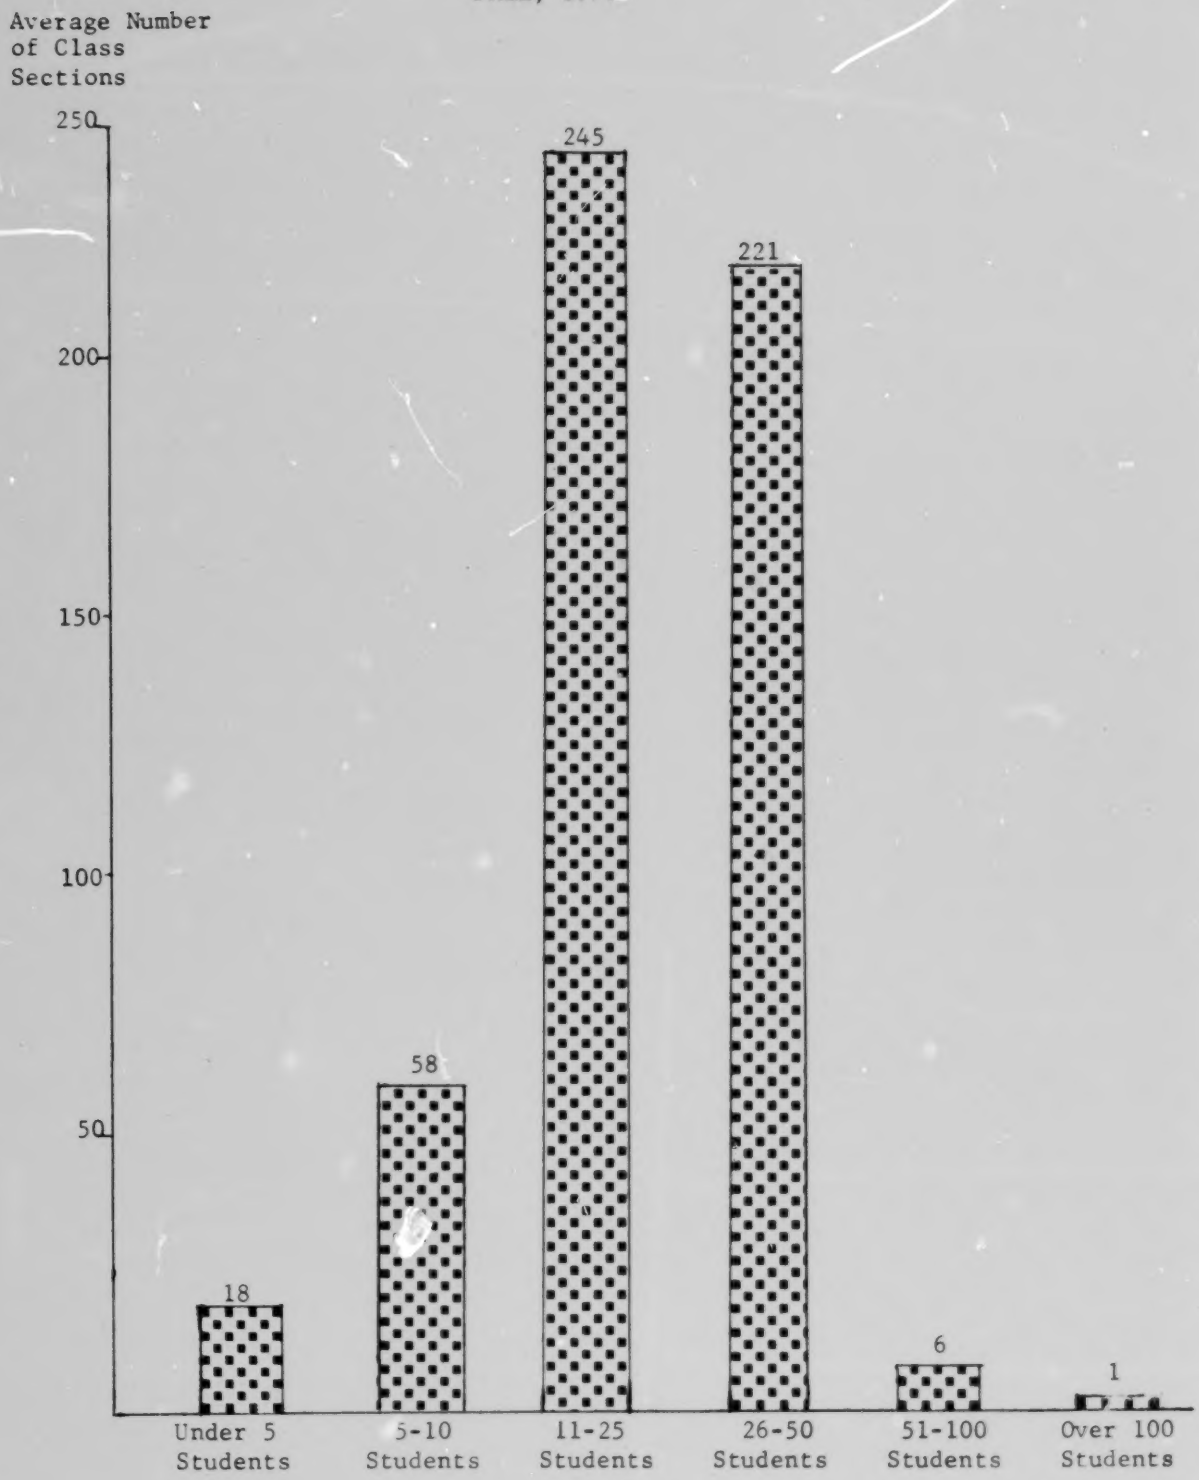
AVERAGE CLASS SIZES
ILLINOIS PUBLIC JUNIOR COLLEGE
FALL, 1970



3. Total periodical titles	1969	10,633
	1970	12,391
4. Average periodical titles per campus	1969	247
	1970	295

Despite this growth, however, 24 campus libraries in 1970 have total holdings of less than 20,000 volumes which is the minimum recommended by the American Library Association and the Illinois Junior College Board. Only 5 campuses have less than 150 periodical titles, which is the minimum number recommended. In 1969, 27 campuses had less than 20,000 volumes and 8 campuses had fewer than 150 periodical titles so some progress in building adequate libraries is being made.

It is also interesting to note that in fall, 1969, the average public junior college library could seat 124 students and was open 61 hours per week. In fall, 1970, the average library could seat 156 students and was open 77 hours per week during the academic year.

Special Notes

In the tables of data regarding libraries in Part II of this report, the reader should know that library holdings at State Community College of East St. Louis are on loan to the college through a cooperative arrangement with Southern Illinois University. Lincoln Trail College and Oakton Community College are newly established. operating for the first time this year. Data on their collections were not available. Lewis and Clark Community College is also newly established, but during the current year, Lewis and Clark is contracting with its predecessor institution, Monticello College, for instruction and supporting services. Hence, Lewis and Clark data cannot be gathered on many measures shown in Part II of this report.

FINANCIAL CHARACTERISTICS--Tables 55 through 77

Illinois public junior colleges are financed by local taxes, state funds, student tuition (at the option of the local board), federal aid, and other revenues that can be obtained. The Master Plan for Higher Education in Illinois suggests that the "state share be approximately 50 percent of the average operating costs of the new junior college system. . . ." Under the master plan, state support may be distributed to the institutions "by flat grant of aid and/or an equalization grant based on the relative financial capabilities of the several junior college districts. . . ." Currently state aid is distributed on a flat grant basis of $15.50 per semester hour of credit or equivalency for each resident of Illinois who is in attendance at mid-term.

Population, Assessed Valuation and Tax Rates

There is an extreme range of equalized assessed valuation (EAV) and population among the junior college districts of Illinois, with Chicago's $12.1 billion tax base and 3.3 million people representing the higher extreme

compared with Shawnee's $172 million tax base and Spoon River's 48,000 population being the lowest. These ranges are partially negated when they are analyzed together as "equalized assessed valuation per capita" (taxable wealth per person). However, the EAV per capita ranges from the $5,803 of Illinois Valley Community College to the $2,590 of John A. Logan Community College.

Total tax rates extended (actually levied), including Bond and Interest and Working Cash Funds, range from a low of 10 cents (per $100 EAV) at Spoon River and McHenry to a high of 41 cents at Highland. Educational Fund rates extended range from a low of 6 cents (per $100 of EAV) at Rock Valley to a high of 20 cents at Rend Lake, John A. Logan, Shawnee, and Southeastern. Building Fund rates have a low of 2 cents at three districts and a high of 10 cents. Total tax rates for operations (Educational and Building Funds) range from a low of 8 cents at Rock Valley to a high of 25 cents at Highland, Illinois Eastern, John A. Logan, Rend Lake, Shawnee and Southeastern.

Special Note

The reader should know that State Community College of East St. Louis is presently funded directly with state monies and no local taxes are levied for its support. This fact causes the tax rates to be reported at "0" in Table 56. Direct state support also necessitated use of the state accounting system during the 1969-70 fiscal year, hence, some financial data are not available for this report.

Audited and Budgeted Revenues and Expenditures

Figure 8 shows the percentage distribution of expenditures in the public junior college system by function for the 1970-71 budgeted fiscal year. Audited and budgeted financial data are reported in identical formats in Part II of this report so that the financial experience of last year can be compared with the financial plan for the current year. Revenues are presented by source both in dollar amounts and as percents. Expenditures are presented by function and by object both in dollar amounts and as percents.

Capital

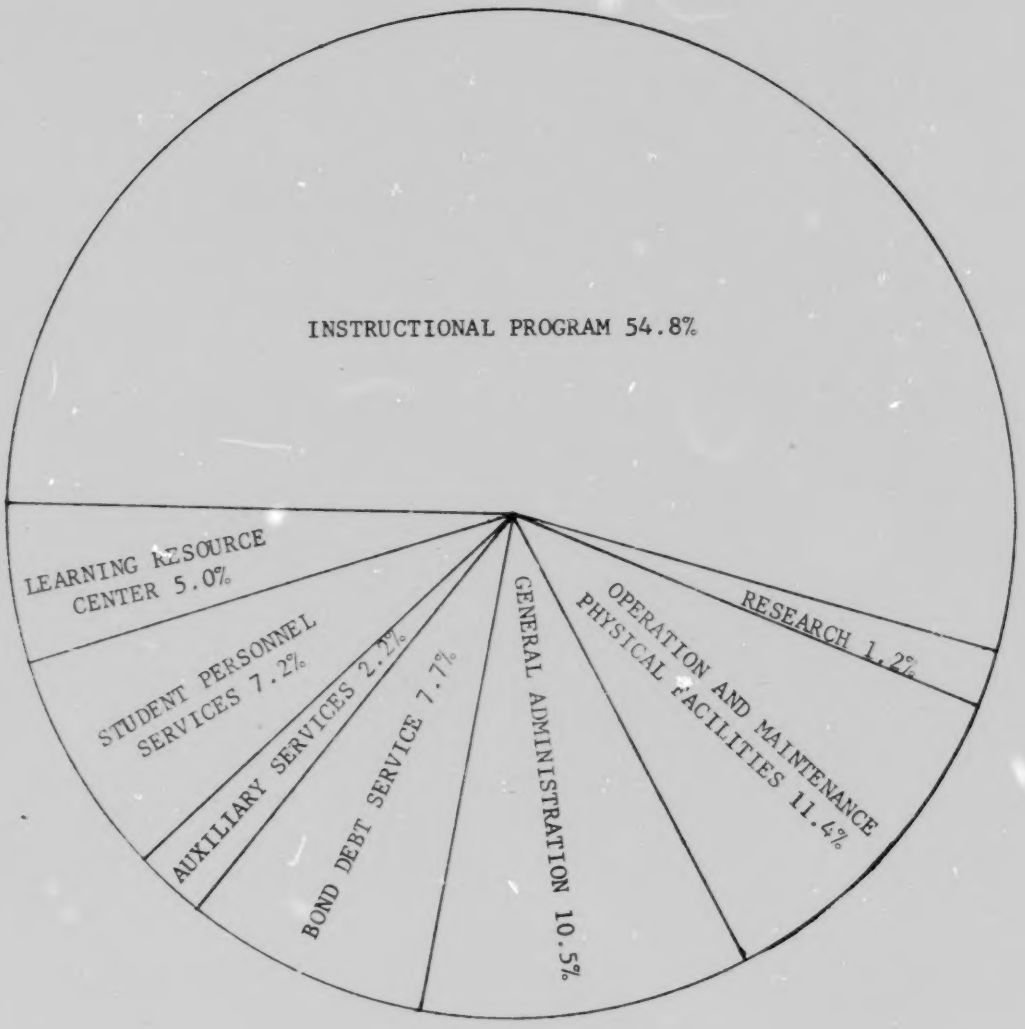
Capital revenues and expenditures reported in this study are mainly monies derived from the sale of bonds and interest on bond monies. Capital expenditures are for those items obtained by the local college and do not include monies spent on the state share of capital construction projects. The local college contributes at least 25 percent of major capital projects (construction of buildings and site improvement) and the state contributes not more than 75 percent of the total cost of such projects.

Capital projects (building construction and site improvements) have been contracted during the last four fiscal years. State funds in the amount of $241,490,000 have been obligated for 30 junior college districts. Annual expenditures obligated to date and planned for the current fiscal year are as follows:

FY 1967	$ 20,490,000	
FY 1968	$ 44,855,000	
FY 1969	$ 80,145,000	
FY 1970	$ 96,000,000	
FY 1971	0	(Budgeted)
TOTAL	$241,490,000	

FIGURE 8

PERCENT OF BUDGETED EXPENDITURES BY FUNCTION
ILLINOIS PUBLIC JUNIOR COLLEGES
1970-71 FISCAL YEAR



In addition to the state's share, federal funds have been granted the projects mentioned above in the following amounts:

FY 1965	$ 2,099,039
FY 1966	$ 4,213,488
FY 1967	$ 4,396,802
FY 1968	$ 2,685,627
FY 1969	$ 3,299,943
FY 1970	$ 1,693,326
FY 1971	$ 1,728,880 (Budgeted)
TOTAL	$ 20,117,105

The total amount (local, state, federal) obligated previously and budgeted this year for capital projects is listed below:

Local	$ 89,409,064
State	$241,490,000
Federal	$ 20,117,105
TOTAL	$351,016,169

The percent of funding for capital projects from all three sources is calculated below:

Local	State	Federal
25.5%	68.8%	5.7%

SITE AND FACILITIES CHARACTERISTICS--Tables 78 through 80

The Annual Application for State Recognition was expanded this year to include information about site and facilities at the 46 junior college campuses across the state. Delays in building programs due to high construction costs and other factors have caused considerable concern by all involved with the rapid development of the public junior college system in Illinois. Figure 9 illustrates why everyone is so concerned. When one considers that the total gross square footage in the Illinois Junior College Board approved master plans does not yet include the permanent facilities needed on five of the newer campuses, and then compares the total footage of permanent structures owned and occupied or under construction at the present time, it becomes apparent that permanent plant is only about one-third of the way toward completion for the total system. Yet, enrollments, as noted previously, continue to burgeon at all public junior college campuses.
